

Your session, intact.

Long AI sessions break when old context falls out of the window. Accordion folds it instead of deleting it — recessed, reversible, never gone.

Accordion makes long AI sessions durable. Nothing is deleted — context is folded, and every fold is reversible.

PRIMARY SEGMENT

Programmers & heavy AI-chat users

People running hours-long coding, agent, and research sessions who need to manage a finite context window.

SECONDARY SEGMENT

AI & agent engineers

Builders of agent products who need explicit, inspectable control over what the model can and can't see.

ANCHOR PERSONA

“Three hours in”

A developer deep in a Claude Code session who can't afford to lose the constraint they set in message one.

REFERENCE BRANDS — BORROW THIS

Linear

Keyboard-first restraint; product-as-hero.

Vercel / Geist

Mono-meets-sans engineering rigor.

Raycast

Dark UI with confident accent color.

xAI

Stark, technical, near-monochrome calm.

MISSION

Keep work alive across the length of a session — so progress never stalls because the agent forgot.

Durability

Work should survive. Sessions are persistent, not disposable. Every decision reinforces continuity and recovery.

You were three hours into a debugging session. The agent forgot the constraint from the first message, and suddenly the work slowed to a crawl. That shouldn't happen — and the usual fix, silently summarizing and discarding old turns, trades one kind of loss for another.

Clarity

No hidden behavior. You can always see what is folded, what is visible, and what the model currently holds.

Trust

Folding changes visibility, not ownership. The information remains available. Nothing is lost.

Accordion takes a different path. Older context is **folded**, not deleted: it leaves the model's active view without leaving the session. Every fold is reversible, every block recoverable, and the colors of the context window — the grammar of what happened — fold together into one continuous spectrum. The session continues.

PRIMARY LOCKUP · ON DARK

ON LIGHT

SYMBOL · THE BELLWS “A”

REVERSED

Clear space & size

Keep a margin of one full bellows-width around the lockup. Minimum legible width: 96 px (digital) / 24 mm (print). The symbol alone carries favicons and app icons down to 16 px.

The mark reads as an accordion bellows *and* the letter A — the instrument that folds, then reopens.

Protect the mark.

✗ Never stretch or distort

✗ Never rotate

✗ Never recolor the mark

✗ Never add drop shadow or effects

✗ Never place on low-contrast ground

✗ Never crop or crowd the mark

Ink carries all text and the logo; the spectrum colors are reserved for block kinds in the product and the brand gradient. Never set body text in a spectrum hue, and never pair two spectrum hues as foreground/background. Maintain 4.5:1 contrast for body copy.

IBM PLEX SANS — DISPLAY & BODY

Your session, intact.

H1 · 46px · 600 · -2% tracking

Folding changes what the agent sees.

H2 · 26px · 600

The information is still there. Every fold is reversible, and every block remains recoverable on the next turn.

Body · 15px · 400 · 1.6 line-height · min 13px

IBM PLEX MONO — DATA

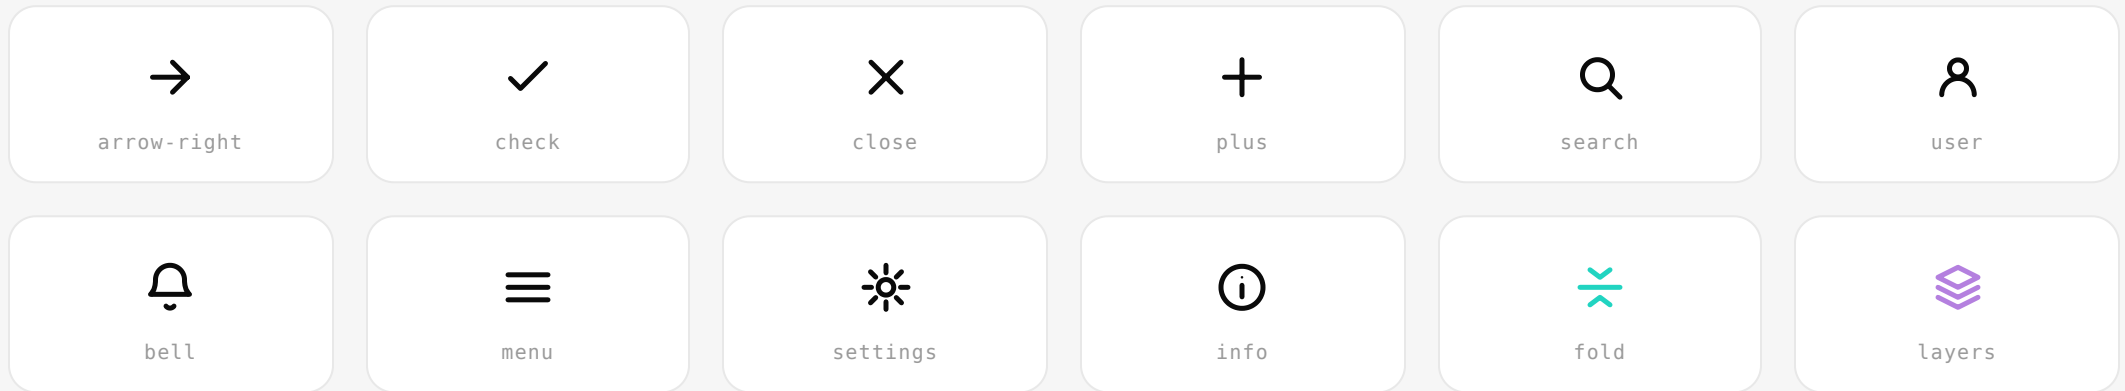

128,000

fold 0x3F

live / folded

Monospace signals data — token counts, fold identifiers, context metrics. Use it sparingly; it is not decoration.

A geometric set, drawn on one grid.

Grid & stroke

24×24 grid, 2 px stroke, round caps and joins, 2 px corner radius. Optical, not geometric, alignment.

Color

Ink or Slate by default. A spectrum hue only when the icon names that block kind.

Beyond the set

Extend with **Lucide** (2 px, rounded) — it matches this grid one-to-one.

Grounded

Direct

Calm

Confident

Practical

We speak like an experienced engineer explaining a system to another engineer. We understand the frustration of context loss, but we never dramatize it. We earn trust through clarity, not hype.

HEADLINE

“Fold context. Keep momentum.”

BODY

The fold is reversible. The information is still there — it just isn't in the model's active view.

BUTTON

Fold older context · Unfold

ERROR

Couldn't reach the session. Your folds are saved — nothing was lost. Retry when ready.

Replace marketing language with observable facts. If a claim can't be seen in the interface, cut it.

Real work, not productivity theater.

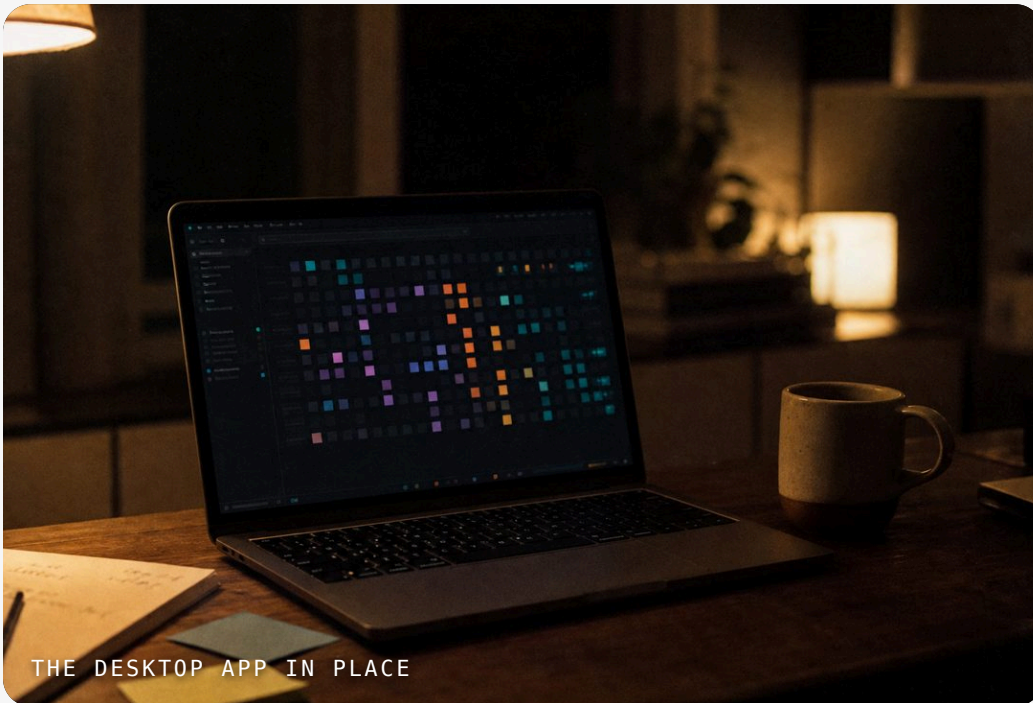

- Subject** Late-night terminals, real desks, hands on keyboards, research in progress.
- Light** Practical only — monitor glow, desk lamps, window light. Natural shadows.
- Color** Near-monochrome rooms; let the screen's spectrum glow be the only color.
- Cast** Racially diverse, varied body types; subjects looking at the work, not the camera.
- Texture** Film grain always. Slight imperfection. Found, not staged.
- Never** Stock smiles, teams pointing at monitors, handshakes, neon cyberpunk, AI-smooth surfaces.

ON A PHONE, CONTEXT IN HAND

THE DEVELOPER'S DESK

THE MARK AS A STICKER

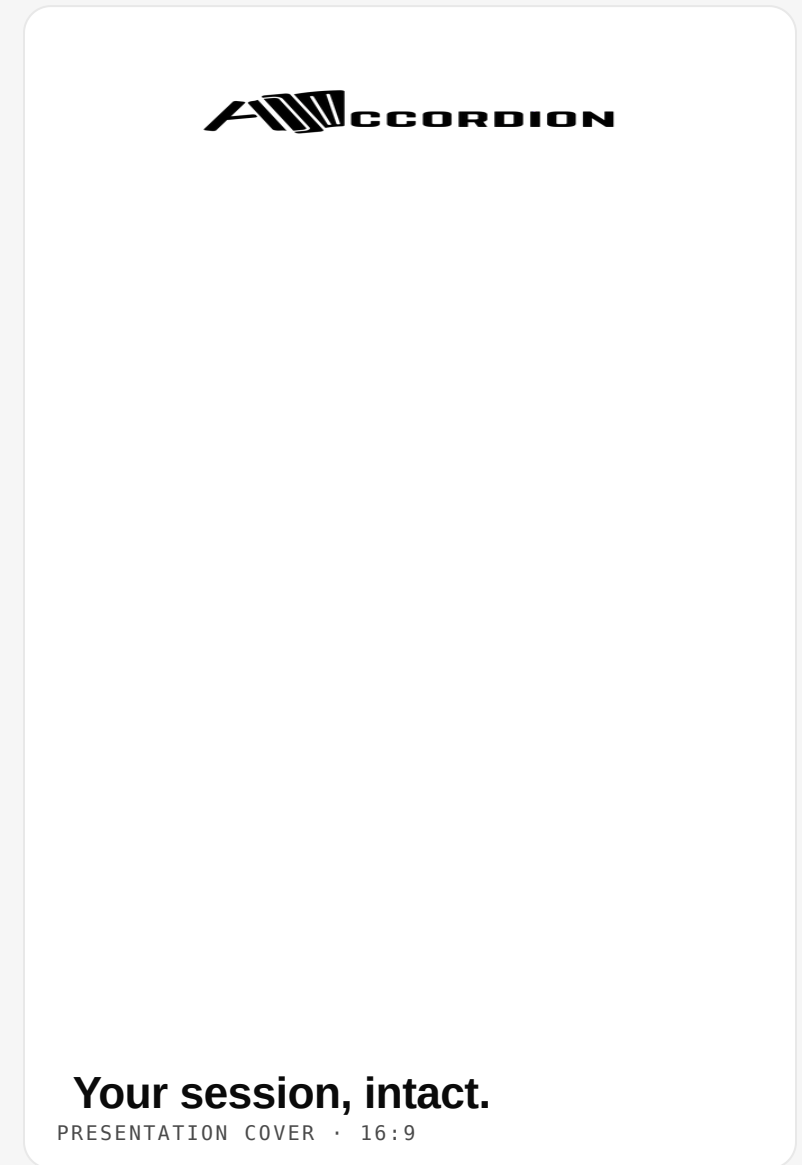

App icon

512 · 1024 px · spectrum
tile

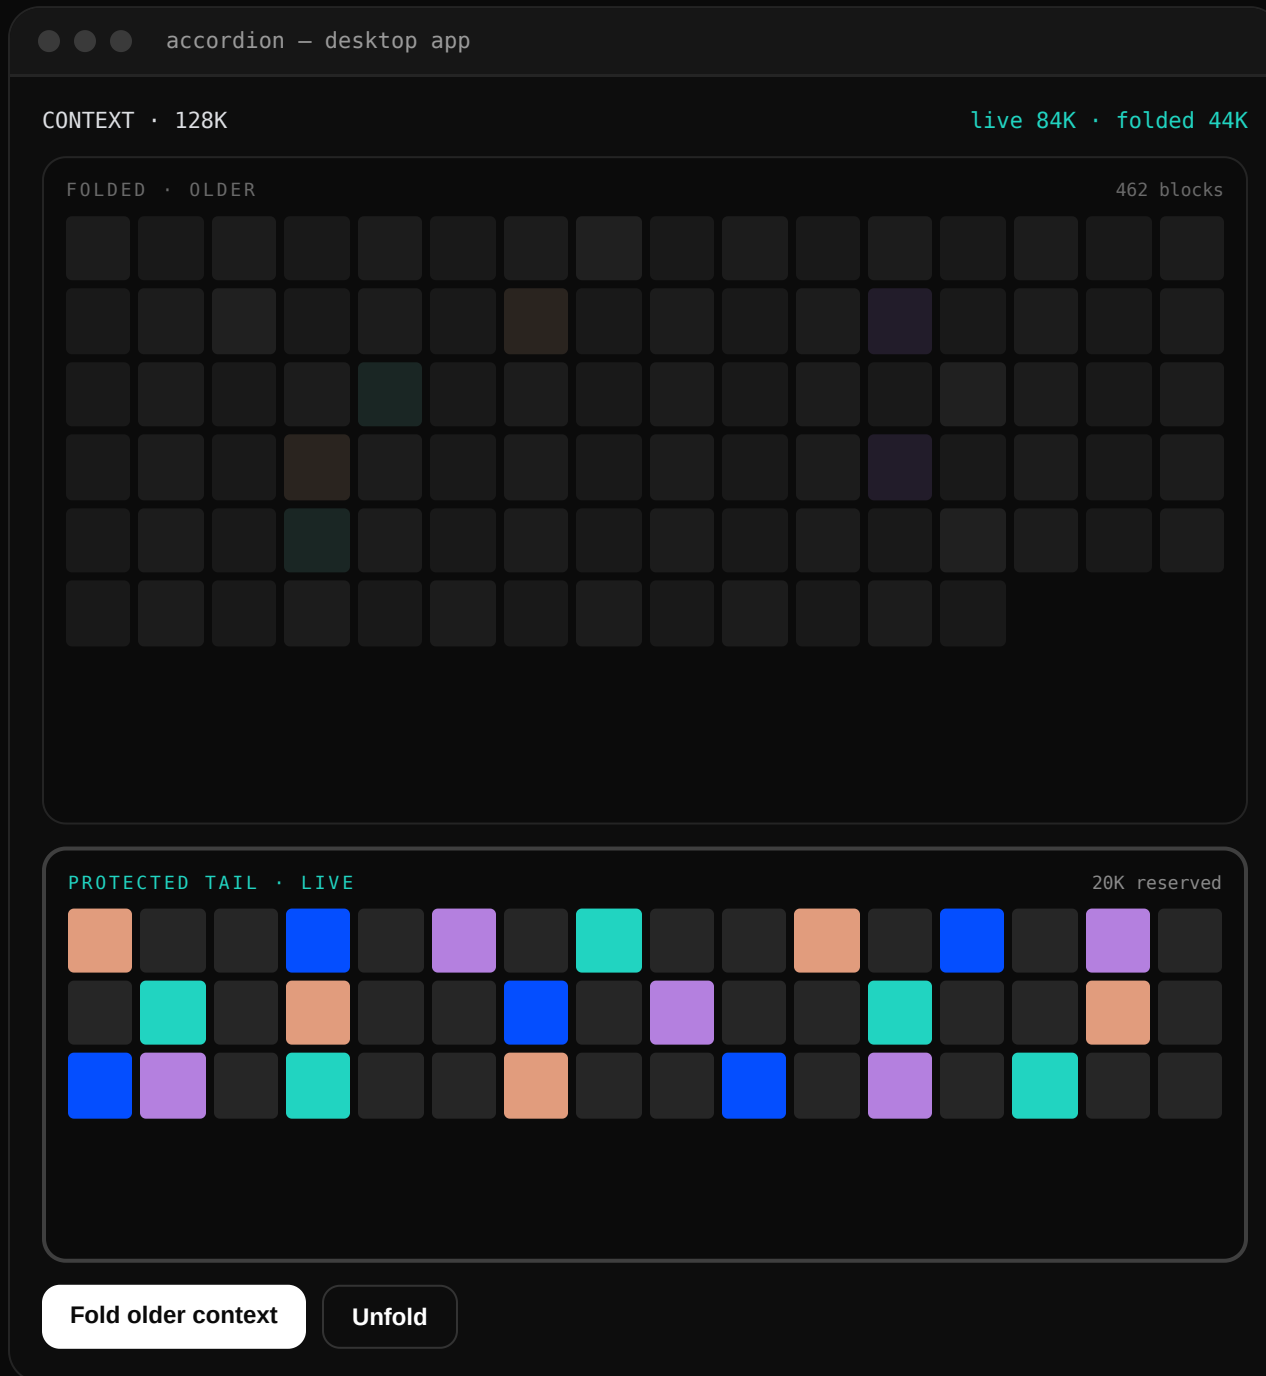

Favicon

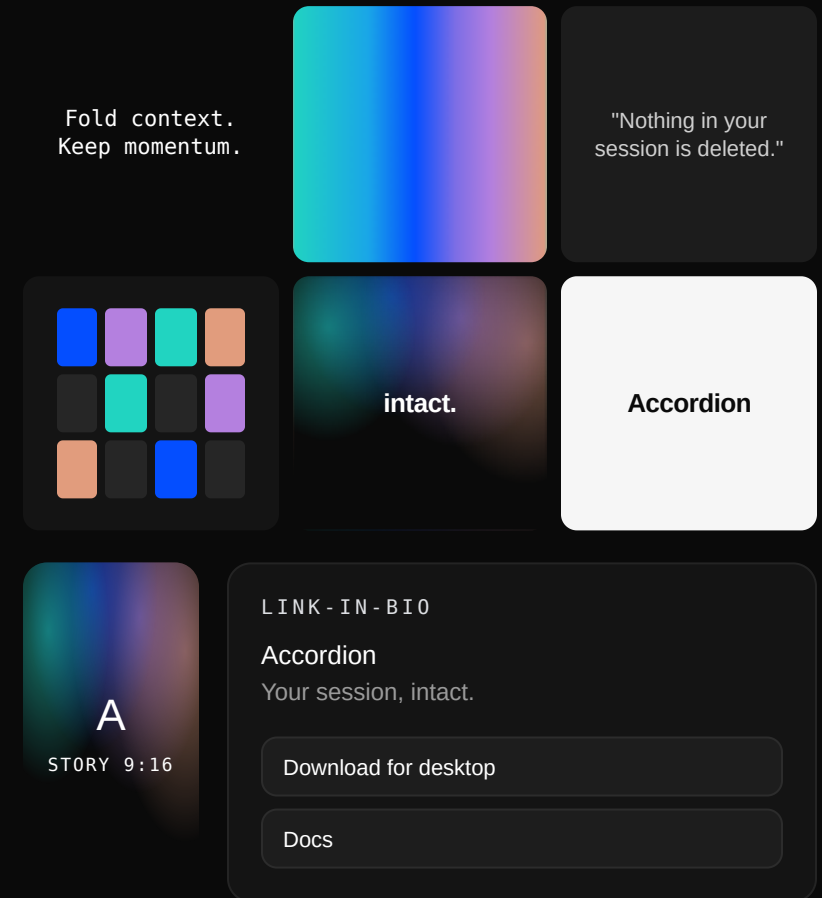

32 / 16 px · symbol only

Die-cut sticker & app tile share one recipe: the spectrum gradient on Ink, the white bellows mark centered, generous corner radius. The wordmark never appears inside the tile — the symbol carries it.

INSTAGRAM GRID

DO

- ✓ Say what the interface does — “folded, not deleted,” “reversible,” “recoverable.”
- ✓ Let the screen's spectrum be the only color; keep everything else Ink and Paper.
- ✓ Reserve each hue for its block kind — blue is the user, never a button.
- ✓ Show real product screenshots before any illustration.
- ✓ Give the wordmark a full bellows-width of clear space in every layout.

DON'T

- ✗ Don't use hype — no “powerful,” “seamless,” “intelligent,” “streamlined.”
- ✗ Don't recolor, rotate, stretch, or shadow the mark.
- ✗ Don't set body text in a spectrum hue or pair two hues as fg/bg.
- ✗ Don't dramatize context loss or imply anything was deleted.
- ✗ Don't crop the tagline mid-word or split “Your session, intact.”
